## BIBLIOGRAPHY

Aasheim, T. S.

1949. Effect of tillage method on soil and moisture conservation in the plains area of northern Montana. Mont. Agr. Expt. Bul. 468: 1-38.

Allen, T. J., and Dollahite, J. W.

1959. Importance of soil moisture and soil temperature in the control of perennial broomweed (*Gutierrezia* spp.). Tex. Agr. Expt. Prog. Rpt. 2073: 1-3.

Axley, J. H., and Thomas, R. P.

1949. Soil moisture variations as influenced by vegetation. Soil Sci. Soc. Amer. Proc. 13: 548-550. Bibliog.

Bennett, O. L., and Doss, B. D.

1960. Effect of soil moisture level on root distribution of cool-season forage species. Agron. Jour. 52: 204-207. Bibliog.

\_\_\_\_\_ and Doss, B. D.

1963. Effects of soil moisture regime on yield and evapotranspiration from cool-season perennial forage species. Agron. Jour. 55: 275-278. Bibliog.

Bethlahmy, Nedavia.

1963. Soil-moisture sampling variation as affected by vegetation and depth of sampling. Soil Sci. 95(3): 211-213.

Beutner, E. L., and Anderson, D.

1943. Effect of surface mulches on water conservation and forage production in some semi-desert grassland soils. Amer. Soc. Agron. Jour. 35: 393-400.

Carroll, J. C.

1943. Effect of drought, temperature and nitrogen on turf grasses. Plant Physiol. 18: 19-36. Bibliog., pp. 35-36.

Chamblee, D. S.

1958. Relative removal of soil moisture by alfalfa and orchard-grass. Agron. Jour. 50: 587-589. Bibliog.

Colman, E. A.

1944. Dependence of field capacity upon the depth of wetting of field soils. Soil Sci. 58: 43-50. Bibliog.

- Crowder, L. V., and Craigmiles, J. P.  
1960. Effect of soil temperature, soil moisture, and flowering on the persistency and forage production of white clover stands. Agron. Jour. 52: 382-385. Bibliog.
- Dennis, R. E., and others.  
1959. Growth responses of alfalfa and Sudangrass in relation to cutting practices and soil moisture. Agron. Jour. 51: 617-621. Bibliog.
- Dreibelbis, F. F., and Post, F. A.  
1941. Inventory of soil water relationships on woodland, pasture, and cultivated soils. Soil Sci. Soc. Amer. Proc. 6: 462-473. Bibliog.
- Dreibelbis, F. R., and Post, F. A.  
1944. Some seasonal changes in the pore space and moisture relationships of woodland, pasture, and cultivated soils. Soil Sci. Soc. Amer. Proc. 8: 102-108. Bibliog.
- Eden, A., and others.  
1951. Effect of ground water-level upon productivity and composition of Fenland grass. Jour. Agr. Sci. 41: 191-202. Bibliog.
- Glendening, G. E.  
1942. Germination and emergence of some native grasses in relation to litter cover and soil moisture. Amer. Soc. Agron. Jour. 34: 797-804. Bibliog.
- Goode, J. E.  
1956. Soil moisture deficits developed under long and short grass. East Malling Res. Sta. Rpt. 1955: 64-68. Bibliog.
- 
1956. Soil moisture deficits under swards of different grass species in an orchard. East Malling Res. Sta. Rpt. 1955: 69-72.
- Hagan, R. M., and Peterson, M. L.  
1953. Soil moisture extraction by irrigated pasture mixtures as influenced by clipping frequency. Agron. Jour. 45: 288-292. Bibliog.
- Hamilton, E. L., and Rowe, P. B.  
1949. Rainfall interception by chaparral in California. Calif. Dept. Nat. Resources Div. Forestry, 43 pp.
- Hudspeth, E. B., and Ellis, G.  
1959. Effect of soil moisture on the emergence of Blackwell switchgrass. Tex. Agr. Expt. Prog. Rpt. 2085: 1-3.

- Hyder, D. N., and Sneva, F. A.  
1956. Seed- and plant-soil relations as affected by seedbed firmness on a sandy loam range land soil. Soil Sci. Soc. Amer. Proc. 20: 416-419.
- Kilmer, Victor J., and others.  
1960. Yield and mineral composition of eight forage species grown at four levels of soil moisture. Agron. Jour. 52: 282-285. Bibliog.
- Kramer, Paul J.  
1949. Plant and soil water relationships. 347 pp. New York, Toronto [etc.] : McGraw-Hill Book Co., Inc.
- Lane, R. D., and McComb, A. L.  
1948. Wilting and soil moisture depletion by tree seedlings and grass. Jour. Forestry 46: 344-349.
- McGinnies, W. J.  
1959. Relationship of furrow depth to moisture content of soil and to seedling establishment on a range soil. Agron. Jour. 51: 13-14.
- Madison, John H., and Hagan, Robert M.  
1962. Extraction of soil moisture by Merion bluegrass (*Poa pratensis* L. 'Merion') turf, as affected by irrigation frequency, mowing height, and other cultural operations. Agron. Jour. 54: 157-160.
- Mitchell, K. J.  
1957. Influence of nitrogen and moisture supply on the growth of pastures during summer. Emp. Jour. Expt. Agr. 25: 69-78. Bibliog.
- Nicholson, H. H., and others.  
1953. Effect of ground water-level upon productivity and composition of Fenland grass. Jour. Agr. Sci. 43: 265-274.
- Partridge, N. L.  
1941. Comparative water usage and depth of rooting of some species of grass. Amer. Soc. Hort. Sci. Proc. 1941: 426-432.
- Post, F. A., and Dreibelbis, F. R.  
1943. Some influences of frost penetration and microclimate on the water relationships of woodland, pasture, and cultivated soils. Soil Sci. Soc. Amer. Proc. 7: 95-104.

Rock, W. L., and Lowe, A.

1950. Effect of date of planting and of pasturing on the depletion of soil moisture during the fall and winter at Garden City, Kans. Agron. Jour. 42: 461.

Rogler, G. A., and Haas, H. J.

1947. Range production as related to soil moisture and precipitation on the northern Great Plains. Amer. Soc. Agron. Jour. 39: 378-389. Bibliog.

Rowe, P. B.

1948. Influence of woodland chaparral on water and soil in central California. Calif. Dept. Nat. Resources Div. Forestry, 70 pp. Bibliog., pp. 63-65.

\_\_\_\_\_ and Reimann, L. F.

1961. Water use by brush, grass, and grass-forb vegetation. Jour. Forestry 59: 175-181. Bibliog.

Schery, R. W.

1960. A vote for bluegrass. Amer. Fruit Grower 80: 48+.

Sneva, F. A., and others.

1958. Influence of ammonium nitrate on the growth and yield of crested wheatgrass on the Oregon high desert. Agron. Jour. 50: 40-44.

Striffler, Wm. D.

1961. Intensity of soil moisture sampling is affected by depth and vegetative cover. U.S. Forest Serv. Lake States Forest Expt. Sta. Tech. Note 603, 2pp.

UNESCO.

1962. Plant-water relationships in arid and semi-arid conditions. Partial contents: 1. Reviews of research on arid zone hydrology. 2. Proceedings of the Ankara symposium on arid zone hydrology. 4. Reviews of research on problems of utilization of saline water. 5. Plant ecology. Proceedings of the Montpelier symposium. 6. Plant ecology. Reviews of research. 12. Arid zone hydrology: recent developments. 15. Plant-water relationships in arid and semi-arid conditions. Reviews of research.

Webster, J. R.

1962. Composition of wet-heath vegetation in relation to aeration of the ground-water and soil. I. Field studies of ground-water and soil aeration in several communities. Jour. Ecol. 50: 619-637.

- 
1962. Composition of wet-heath vegetation in relation to aeration of the ground-water and soil. II. Response of *Molinia coerulea* to controlled conditions of soil aeration and ground-water movement. Jour. Ecol. 50: 639-650.

Wilner, J.

1955. Effect of low temperatures on available soil moisture during winters on the Canadian prairies. Agron. Jour. 47: 411-413. Bibliog.

Yamamoto, Teruo.

1963. Soil moisture constants and physical properties of selected soils in Hawaii. Pac. SW. Forest & Range Expt. Sta. U.S. Forest Serv. Res. Paper PSW-P2, 10 pp. (Pasture and idle grassland included.)

The FOREST SERVICE of the  
U. S. DEPARTMENT OF AGRICULTURE  
is dedicated to the principle of multiple use management of the Nation's forest resources for sustained yields of wood, water, forage, wildlife, and recreation. Through forestry research, cooperation with the States and private forest owners, and management of the National Forests and National Grasslands, it strives — as directed by Congress — to provide increasingly greater service to a growing Nation.
